

What I like about tutoring is that MS. Naji gives us CST practice and when MS. Han comes for council and when me and the class go to MS. Han class for spelling questions. Also, tutoring help me alot I am really improving my work from my English class. And tutoring is helpful for me to get ready for the big test the CST from I could get a basic, proficient and advanced so tutoring is helping me alot.

I want change the tutoring by having more educational games and doing activities. Other thing I want to change is that when we come to the tutoring is to have something writed in a poster, so we can see and know when we forget something like words. Another thing I want to change is to talk in complete sentence. Finally the other thing is to have a lot of party and watch a movie.
