## Philosophical Chairs Report

Central Statement/Topic: Should schools be responsible for punishing cyberbullies.

My original position:

Pro

Con

Undecided

How many times did I change my seat? 0

My ending position:

Pro

Con

Undecided

How open-minded was I as I listened to other people talk?

- Mostly open-minded
- Partially open-minded
- Not very open-minded

Use the space below to explain why your position did or did not change and the reasons for your thinking.

I did not change my answer because it is kind of the schools fault. First of all if a student is cyberbullying they should at least tell the princable to check on the chat room and they could help him/her to talk about it. So if a student is getting cyberbullying you should tell an adult, teacher, princable, or deal with it by your self.

*Strategies for Success*

44.  A  B  C  D

I choose A because he was "illuminating" a voice in his head.

45.  A  B  C  D

It is A because the little prince told the guy "It does not matter that he cannot draw"

46.  A  B  C  D

I choose D because the guy was communicating to the Little Prince.

47.  A  B  C  D

I choose C because the guy was illuminating about the little prince.

48.  A  B  C  D

I choose C because The Little Prince is actually a novel they just took part of it and make it into a short story.
